gold, a precious metal, is prized for two important characteristics. First of all, gold has a lustrous beauty that is resistant to corrosion. Therefore, it is suitable for jewelry, coins, and ornamental purposes. Gold never needs to be polished and will remain beautiful forever. For example, a Macedonian coin remains as un tarnished to day as the day it was minted twenty-three centuries ago. Another important characteristic of gold is usefulness to industry and science. For many years, it has been used in hundreds of industrial applications. The most recent use of gold is in astronaut's suits. Astronauts wear gold-plated heat shields for protection outside spacecrafts. In conclusion, gold is treasured not only for its beauty, but also for its utility.

missioner. She was 63-year old. He was Wayne. He was Mr Eric Smithson. "I knew he wouldn't knock me down if I stood my ground."

In one recent encounter managed to stop a ten-ton wagon using only a pram, making the wagon reverse for three quarters of a mile through a park. 83-year-old Mrs Norrah Padstow was playing with her grandson, 26 years, in Jubilee Park, Dudley, last week when she saw a ten-ton wagon attempting to take a short cut along a pedestrian-only path across the park. "I was that he was breaching the law and putting children at risk, she pushed her pram in front of the wagon and refused to move. The driver, Mr Eric Smithson, argued with her pram in some time but eventually had to reverse all the way back to the ring road. Mrs Padstow told our reporter, "I know he wouldn't knock me down if I stood my ground. Wagon drivers keep using the park as a short cut to avoid the traffic jams in the town centre but they shouldn't do it and one day a child will get hurt". Mr Smithson was not available for comment.

How old was Mrs. North-Parker?

In brief, the computer age has arrived, and it is changing our lives. Computers have made communicating and doing business faster and more convenient, and they have greatly increased our access to information. Just as the invention of automobiles had an unplanned consequence—the growth of suburbs—so will the invention of personal computers. We will have to wait and see what these unintentional consequences will be.

Teknik ini diartikan sebagai salah satu teknik membaca yang berkenaan dengan pengenalan pola pengorganisasian teks atau pengenalan jenis-jenis paragraf. Teknik ini sangat penting ketika Anda ingin mengenali bagaimana penulis mengorganisasi ide-idenya dalam suatu teks.

There are three reasons why Canada is one of the best countries in the world. *First*, Canada has an excellent health care system. All Canadians have access to medical services at a reasonable price. *Second*, Canada has a high standard of education. Students are taught by well-trained teachers and are encouraged to continue studying at university. *Finally*, Canada's cities are clean and efficiently managed. Canadian cities have many parks and lots of space for people to live. As a result, Canada is a desirable place to live.

In this case, inference is a way of guessing or think logic to be critical, it means that means they look for clues from what do they read and they make prediction or conclusion. The clues that they have gotten can be used to guess the information that is stated or unstated from the text. Read the conversations quickly and answer the questions below based on clues in the conversations. Read the conversation carefully and answer the questions.

A: I wish I had not made that mistake, Sir.

B: You have to tell your parents about this, Son.

A: Please, Sir. I do apologize. I promise I will not cheat anymore.

B: Ok, you have to write 100 expressions of regret on your notebook then.

A: Ok, Sir. Right away
B: Go on.
